

# Global COE Special Seminar

演者： Dr. Jeffrey V. Ravetch

Theresa and Eugene Lang Professor,  
Head, Laboratory of Molecular Genetics and  
Immunology  
The Rockefeller University, U.S.A.

演題： “New roles for antibodies”

日時： 2007 年 11 月 12 日 (月)

16:30 ~ 17:30

場所： 東京大学大学院医学系研究科・

教育研究棟 13 階第 6 セミナー室

Dr. Ravetch has discovered key mechanisms, in which receptors for the Fc regions of immunoglobulin mediate their functions by elegant gene disruption studies. He unraveled that both stimulatory and inhibitory Fc receptors exist and act together to insure the efficacy of therapeutic antibodies and the limitation of autoimmunity.
